Profile

RHCSA Certified Junior DevOps & System Engineer with hands-on experience in Linux administration, cloud infrastructure, and automation. Skilled in Docker, Kubernetes, CI/CD, Terraform, vSphere, and Windows Server (MCSA). Familiar with backend development using Node.js to support deployment and integration. Focused on improving system reliability and reducing costs through automation and containerization.

Education

- **Bachelor's Degree in Computer Science**

Graduation Year: 2024

Grade: Distinction

Certifications

- | | |
|---|-------------|
| • Red Hat Certified System Administrator (RHCSA) | 2025 |
| • HCCDA-Tech Essentials | 2025 |

Courses & Training

- | | |
|--|-------------|
| • ITI-System Administration | 2025 |
| • AWS Certified Solutions Architect – Associate (Pending) | 2025 |
| • Kubernetes & Docker Administrator | 2024 |
| • CI/CD Automation with Jenkins & Terraform | 2024 |
| • Advanced Linux System Administration | 2024 |
| • NestJS Framework Mastery | 2024 |
| • Node.js Development | 2024 |
| • Azure Responsible AI Workshop | 2024 |
| • NodeJS Build a Full Ecommerce RESTful APIs | 2024 |
| • Build Responsive Real-World Websites with HTML , CSS and JavaScript | 2024 |

Technical Skills

DevOps, Cloud, & Infrastructure Automation

- Containerization & Orchestration: Kubernetes, Docker, Helm
- CI/CD & Automation: Jenkins, GitHub Actions, AWS Code Deploy, ArgoCD
- Cloud Services: AWS, Azure, Huawei Cloud
- Infrastructure as Code (IaC): Ansible, Terraform
- Monitoring & Performance Optimization: Prometheus, Grafana, Loki
- Security & Networking: Auto Scaling, Load Balancing, VPN Configuration
- Virtualization & Systems: VMware vSphere, Windows Server (MCSA)

Backend Development & API Architecture

- Node.js Frameworks: NestJS, ExpressJS
- API Development: RESTful APIs, WebSockets
- Database Management: MongoDB, PostgreSQL, MySQL
- Authentication & Security: JWT, OAuth 2.0, SSL Encryption

Programming Languages & Development Tools

- Languages: JavaScript, TypeScript, Python, Java, Bash
- Tools & Utilities: Cron Jobs, Git, Shell Scripting

Project Highlights

Java Application Deployment Pipeline

(GitHub) – Designed and implemented a fully automated CI/CD pipeline for a Java application using Jenkins, Docker, Kubernetes, and ArgoCD, with IaC via Terraform on AWS. Integrated ECR, Prometheus/Grafana/Loki for observability and Slack **notify**, and implemented GitOps workflows for scalable, secure, and production-ready deployments.

Terraform AWS Deploy Infra

(GitHub) – Provisioned a secure, scalable AWS infrastructure using Terraform, including VPC with public/private subnets, NAT & Internet Gateways, ALBs, and EC2 instances for Nginx reverse proxy and private Node.js backend, enabling high availability and secure network segmentation.

Kubeadm Microservices Deployment

(GitHub) – Deployed a multi-service Kubernetes cluster (Kubeadm) with HPA, NetworkPolicies, persistent storage, and integrated monitoring via Prometheus & Grafana.

E-Commerce API

(GitHub) – Developed a modular ExpressJS-based e-commerce backend with authentication, product management, and order processing containerized with Docker, automated via Ansible & Jenkins, and monitored using Prometheus & Grafana.

Real-Time Chat Application

(GitHub) – Built a scalable NestJS & Socket.IO cloud chat platform with Kubernetes orchestration on AWS, WebSocket-based messaging, and performance monitoring via Prometheus & Grafana.

Soft Skills

- Presentation/Communication Skills
- Problem Solving
- Time Management
- Team collaborator

Military Service

- Exemption

Languages

- Arabic - Native
- English - Professional Working Proficiency
